

Privacy Policy

Last updated: 11 August 2026

Zen Consulting ("Zen Consulting", "we", "us", or "our") respects your privacy and is committed to handling personal data responsibly.

This Privacy Policy explains how we collect, use, disclose, retain, and otherwise process personal data when you visit <https://zen-consulting.co/>, contact us, submit an inquiry, communicate with us, or engage us for our services.

Zen Consulting provides custom software development, website and application development, software maintenance, hosting, technical consulting, bug fixing, automation, and related technology services.

This Privacy Policy describes our current practices. As our business, technology infrastructure, and services develop, we may update this Policy to reflect changes.

1. Who We Are

Zen Consulting is currently an **unincorporated technology consultancy operated by its founding team from Pune, Maharashtra, India.**

We currently operate remotely and may provide services to customers in India, Germany, the wider European Economic Area, the United Kingdom, the UAE, Qatar, and other jurisdictions.

Zen Consulting is considering formal incorporation in the future. If our legal structure changes, we may update this Privacy Policy and our identifying information accordingly.

For privacy-related questions, requests, or concerns, contact us at:

Email: hello@zenconsulting.dev

Current operating location: Pune, Maharashtra, India

2. Scope of This Privacy Policy

This Privacy Policy applies to personal data processed by Zen Consulting in connection with:

- Our website;
- Website visitors;
- Contact and project inquiry submissions;
- Prospective customers;
- Customer and business communications;
- Our own business administration;
- Consulting and software-development engagements; and
- Other direct interactions with Zen Consulting.

This Privacy Policy does **not necessarily apply to personal data that our customers independently collect and process through software or systems that Zen Consulting builds, hosts, maintains, or supports for them.**

Where Zen Consulting processes personal data on behalf of a customer, the customer's own privacy notice and applicable contractual arrangements may also apply.

3. What Personal Data We Collect

The personal data we collect depends on how you interact with us.

3.1 Information You Provide Directly

If you submit an inquiry through our website, we may collect:

- First name;
- Last name;
- Email address;
- Company name, if provided;
- The type of service you are interested in;
- Your preferred service plan, if provided; and
- Information you voluntarily provide in the description of your project, business, workflow, technical problem, or requirements.

You may also provide personal data when communicating with us by email, telephone, WhatsApp, or other communication channels.

3.2 Business and Project Information

If you contact us about a potential project, we may process information necessary to understand and evaluate the proposed engagement.

This may include:

- Your business or organization;
- Your role or relationship to the organization;
- Project requirements;
- Technical requirements;
- Existing software or systems;
- Business workflows;
- Problems you want us to solve;
- Budget or commercial information you voluntarily provide; and
- Other information reasonably necessary to discuss a potential engagement.

3.3 Information from Public Sources

We may conduct reasonable business-development research using publicly available information to identify potential business customers or understand organizations that may benefit from our services.

We do not currently purchase or rent third-party marketing databases.

3.4 Technical Information

When you visit our website, technical information may be processed by our hosting, networking, security, domain, or other infrastructure providers.

Depending on our technology configuration, this may include information such as:

- IP address;
- Browser type;
- Device type;
- Operating system;
- Referring URL;
- Requested URL;
- Date and time of access;
- Network information; and
- Technical or security logs.

The precise technical information collected depends on the infrastructure and services actually used by Zen Consulting and our website providers.

4. Information We Ask You Not to Submit

Our general website inquiry form is intended for ordinary business and project inquiries.

Unless we specifically request it and provide an appropriate method for submitting it, please do not provide:

- Passwords;
- Payment-card information;
- Government identification numbers;
- Medical records;
- Health information;
- Biometric information;
- Information about criminal convictions;
- Highly confidential business secrets; or
- Other sensitive or special-category personal data.

If you voluntarily provide information that we did not request, we will handle it in accordance with applicable law and the circumstances of the relevant interaction.

5. How We Use Personal Data

Depending on the circumstances, Zen Consulting may use personal data to:

- Respond to inquiries;
- Understand your requirements;
- Communicate with prospective or existing customers;
- Schedule meetings or calls;
- Evaluate potential projects;
- Prepare proposals, estimates, or quotations;
- Enter into and perform contracts;
- Provide consulting services;
- Develop software;
- Develop websites, web applications, and mobile applications;
- Host and maintain software;
- Provide technical support;
- Diagnose and resolve bugs or technical problems;
- Monitor and maintain systems where contractually required;
- Maintain the security and functionality of our services;
- Prevent misuse, fraud, or security incidents;
- Manage our business relationships;

- Maintain appropriate business, accounting, and tax records;
- Comply with applicable legal obligations;
- Establish, exercise, or defend legal claims; and
- Carry out other purposes that are reasonably related to the purposes described above and permitted by applicable law.

We do **not currently sell personal data** as a business activity.

We do **not currently operate behavioural advertising or sell personal data for targeted advertising**.

6. Legal Bases for Processing

Where applicable privacy law requires a legal basis for processing, we will rely on an appropriate legal basis for the relevant activity.

Depending on the circumstances and applicable law, this may include:

Contractual necessity

We may process personal data where necessary to enter into or perform a contract with you or to take steps at your request before entering into a contract.

For example, we may process your contact and project information when preparing a software-development proposal.

Legitimate interests

Where permitted by applicable law, we may process personal data where necessary for our legitimate interests, provided those interests are not overridden by your rights and interests.

These interests may include:

- Operating our business;
- Responding to business inquiries;
- Managing customer relationships;
- Maintaining website and system security;
- Preventing misuse or fraud;
- Improving our services; and
- Establishing or defending legal claims.

Legal obligations

We may process personal data where necessary to comply with applicable legal, regulatory, accounting, tax, or other obligations.

Consent

Where applicable law requires consent, we will request it before carrying out the relevant processing.

Where processing is based on consent, you may withdraw that consent where permitted by applicable law. Withdrawal does not affect processing that occurred before withdrawal.

The legal basis applicable to a particular processing activity may vary depending on the jurisdiction and circumstances.

7. Client Projects and Our Role as a Processor

A significant part of Zen Consulting's business involves developing, hosting, maintaining, and supporting software for customers.

Those systems may contain personal data belonging to the customer's own users, customers, employees, patients, or other individuals.

For example, a customer may engage us to build software for a clinic, and that software may process information relating to the clinic's patients.

In such circumstances, the customer may determine:

- What information is collected;
- Why it is collected;
- How it is used;
- Which individuals' information is processed; and
- How long the information should be retained.

Where Zen Consulting processes personal data on the customer's documented instructions and on the customer's behalf, Zen Consulting may act as a **processor, service provider, or equivalent role**, while the customer may act as the relevant controller, business, or equivalent entity.

Our role is determined on a **processing-activity and project-specific basis**.

Zen Consulting may also act as a controller or equivalent entity for personal data relating to our own business operations, such as website inquiries, business communications, and administration.

8. Customer Data Processing

Where Zen Consulting acts as a processor or equivalent service provider, we will process customer personal data in accordance with the applicable customer agreement, instructions, and applicable law.

Depending on the service, we may process customer data for purposes such as:

- Providing the contracted service;
- Hosting software;
- Maintaining software;
- Troubleshooting;
- Fixing bugs;
- Monitoring systems where required to operate the service;
- Providing technical support;
- Maintaining security; and
- Performing other activities reasonably necessary to provide the contracted services.

Where required, the relationship may be governed by a separate **Data Processing Agreement (DPA)** or equivalent contractual terms.

A customer's DPA or service agreement may contain additional requirements concerning:

- Categories of personal data;
- Categories of data subjects;
- Security measures;
- Subprocessors;
- International transfers;
- Data-subject requests;
- Data breaches;
- Retention;
- Deletion or return of data; and
- Audits or other compliance requirements.

9. Sharing Personal Data

We may disclose personal data where reasonably necessary for the purposes described in this Privacy Policy.

Service providers

We may use third-party service providers for functions such as:

- Website hosting;
- Domain and DNS services;
- Cloud infrastructure;
- Business email;
- Software-development infrastructure;
- Security services;
- Communication services;
- Technical support; and
- Other infrastructure required to operate our business.

We will only identify particular providers in our privacy documentation where their involvement and relevant processing activities have been verified.

Professional advisers

We may disclose information to professional advisers such as lawyers, accountants, auditors, or other advisers where reasonably necessary.

Legal and regulatory authorities

We may disclose personal data where required or permitted by applicable law, regulation, legal process, or a valid governmental request.

Business transactions

If Zen Consulting is incorporated, reorganized, merged, acquired, or otherwise involved in a business transaction, personal data may be transferred as part of that transaction where permitted by applicable law.

We do not sell personal data to third parties as a commercial activity.

10. Third-Party Providers and Subprocessors

Zen Consulting's technology stack is developing as our business grows.

We will maintain appropriate records of the third-party providers that process personal data on our behalf.

Where Zen Consulting acts as a processor for a customer, third-party providers that process that customer's personal data may constitute **subprocessors**.

Where required by applicable law or contract, relevant subprocessors will be disclosed to customers through the applicable contractual or DPA process.

We will not claim that a particular company is a Zen Consulting subprocessor unless that company has actually been engaged to process relevant personal data.

11. Artificial Intelligence

Zen Consulting uses AI-assisted software-development and productivity tools as part of our internal development workflow.

These tools may assist our team with activities such as:

- Writing or reviewing code;
- Debugging;
- Generating development suggestions;
- Documentation; and
- Other software-development tasks.

We do not intentionally use personal data submitted through our website to train our own AI models.

We also do not intentionally use customer personal data to train our own AI models.

The particular AI tools used by our team may change over time.

We will assess the handling of personal data by relevant AI providers before intentionally submitting personal data to those providers for processing.

If a customer specifically engages Zen Consulting to develop an AI-enabled product, the processing of personal data by that product will be governed by the applicable project requirements, contractual terms, and applicable law.

Where an external AI provider is required to process personal data as part of a customer project, that processing should be documented and assessed before implementation.

12. International Data Transfers

Zen Consulting operates from India and may work with customers, contractors, and service providers located in other countries.

As a result, personal data may be processed outside the country in which you are located.

The countries in which data may be processed will depend on the actual infrastructure and service providers used for the relevant service.

Where applicable law restricts international transfers of personal data, we will implement an appropriate legally recognized transfer mechanism or other lawful basis before carrying out the relevant transfer.

Depending on the circumstances, this may include mechanisms recognized under the applicable law, such as an adequacy decision, contractual safeguards, or another legally permitted mechanism.

We will not represent that a particular transfer mechanism applies unless it has actually been established for the relevant processing activity.

For customer projects, international transfer requirements may also be addressed through the applicable customer agreement or DPA.

13. Data Retention

We retain personal data only for as long as reasonably necessary for the purposes for which it was collected, unless a longer period is required or permitted by law.

The appropriate retention period depends on factors including:

- The nature of the information;
- The purpose of processing;
- The nature of our relationship with you;
- Contractual requirements;
- Legal and regulatory obligations;
- Accounting and tax requirements;
- Security considerations;

- Dispute resolution; and
- The establishment, exercise, or defence of legal claims.

For customer projects, retention and deletion of customer data will generally be determined by the applicable agreement, DPA, project requirements, and applicable law.

When personal data is no longer reasonably required and there is no legal or legitimate reason to retain it, we will seek to delete, anonymize, or otherwise dispose of it appropriately.

14. Data Security

We take reasonable technical and organizational measures appropriate to the circumstances to protect personal data against unauthorized access, loss, misuse, alteration, or disclosure.

The measures appropriate to a particular service may depend on:

- The nature of the personal data;
- The risks associated with the processing;
- The technology being used;
- The customer's requirements; and
- Applicable legal and contractual obligations.

We do not currently claim certification under standards such as ISO 27001 or SOC 2.

We also do not represent that information transmitted over the public internet can be guaranteed to be completely secure.

Where a security incident involving personal data occurs, we will assess the incident and take steps required by applicable law and our contractual obligations.

For customer projects, additional security obligations may be specified in the applicable contract or DPA.

15. Cookies and Similar Technologies

Our website may use cookies or similar technologies that are necessary for the operation, security, hosting, or functionality of the website.

The exact cookies and technologies used may depend on our hosting, infrastructure, and website configuration.

We do not currently intentionally operate behavioural advertising or advertising-tracking technologies on our website.

We are continuing to verify the website's technical configuration to ensure that our cookie disclosures accurately reflect the technologies actually in use.

If we introduce non-essential cookies, analytics technologies, advertising technologies, or similar technologies for which consent is required by applicable law, we will provide an appropriate notice and consent mechanism where required.

16. Marketing

We do not currently operate a newsletter or regular marketing-email subscription through our website.

We may communicate with prospective or existing customers about our services where permitted by applicable law.

If we introduce direct marketing activities that require consent or a specific opt-out mechanism, we will provide the required controls.

You may contact us at **hello@zenconsulting.dev** regarding marketing communications.

17. Children's Privacy

Our website is primarily intended for businesses, organizations, professionals, and other customers and is not specifically directed toward children.

We do not knowingly solicit personal data directly from children through our website.

However, software developed by Zen Consulting for customers may potentially be used by children or process information relating to children.

Where Zen Consulting processes children's personal data as a processor on behalf of a customer, the customer is generally responsible for determining the appropriate purposes, legal basis, notices, and safeguards for that processing, subject to applicable law and the relevant contractual arrangement.

If you believe that a child has provided personal data directly to Zen Consulting through our website, please contact us at:

hello@zenconsulting.dev

18. Your Privacy Rights

Depending on your location and the law applicable to the relevant processing, you may have rights relating to your personal data.

These may include, where applicable:

- The right to access personal data;
- The right to correct inaccurate or incomplete personal data;
- The right to request deletion;
- The right to request restriction of processing;
- The right to object to certain processing;
- The right to data portability;
- The right to withdraw consent where processing is based on consent;
- The right to object to certain direct marketing; and
- The right to lodge a complaint with a competent supervisory or regulatory authority.

These rights are not necessarily available in every jurisdiction or in every circumstance.

Certain exemptions and limitations may apply under applicable law.

19. Exercising Your Rights

To submit a privacy request, contact us at:

hello@zenconsulting.dev

Please provide enough information for us to understand your request and, where reasonably necessary, verify your identity.

We will respond to valid requests within the period required by the applicable law.

If your request concerns personal data that Zen Consulting processes on behalf of one of our customers, we may refer the request to that customer or assist the customer in responding, depending on the applicable legal and contractual arrangement.

We will not require you to provide more information than reasonably necessary to verify and process your request.

20. Complaints

If you have concerns about how Zen Consulting handles your personal data, please contact us first at:

hello@zenconsulting.dev

Where applicable law gives you the right to complain to a data-protection authority or other regulatory body, you may also exercise that right.

The appropriate authority will depend on your location, the applicable law, and the nature of the processing.

21. European Economic Area and UK

Zen Consulting is currently operated from India and does not currently have a formally appointed:

- Representative in the European Union/EEA under Article 27 of the GDPR; or
- UK representative under the UK GDPR.

The fact that a member of Zen Consulting's founding team holds German citizenship does **not** itself constitute the appointment of an EEA representative.

Whether Zen Consulting is subject to the GDPR or UK GDPR, and whether a representative is required, depends on the applicable territorial-scope rules and the nature of our activities and processing.

If applicable law requires Zen Consulting to appoint a representative, we will take appropriate steps to do so.

22. India

Zen Consulting operates from India and will comply with applicable Indian privacy and data-protection requirements relevant to our processing activities.

Where the Digital Personal Data Protection Act, 2023 ("DPDP Act") and applicable rules apply to our processing, we will process personal data in accordance with the requirements applicable to us.

Our obligations may vary depending on whether we are acting as a Data Fiduciary or processing personal data on behalf of another organization.

Where Zen Consulting processes personal data on behalf of a customer, the applicable contractual arrangement may allocate responsibilities between the parties in accordance with applicable law.

23. Other Jurisdictions

Zen Consulting may work with customers or individuals located in jurisdictions including the UAE, Qatar, the UK, Germany, other EU/EEA countries, and elsewhere.

Where privacy or data-protection laws in those jurisdictions apply to our processing, we will comply with the requirements applicable to the relevant processing activity.

The applicability of a particular law depends on factors including:

- Where the relevant individual is located;
- Where Zen Consulting is established;
- Where the customer is established;
- The nature of the services;
- The nature and scale of processing;
- Whether we are acting as a controller or processor; and
- The specific territorial-scope provisions of the applicable law.

We do not claim that every privacy law in every jurisdiction applies to every interaction with Zen Consulting.

24. Data Protection Officer

Zen Consulting does not currently have a designated Data Protection Officer.

If our processing activities change in a way that creates a legal requirement to appoint a Data Protection Officer, we will assess that requirement and make an appropriate appointment where required.

For privacy-related questions in the meantime, please contact:

hello@zenconsulting.dev

25. Changes to This Privacy Policy

We may update this Privacy Policy from time to time.

We may update it when:

- Our services change;
- We introduce new website functionality;
- We introduce new processing activities;
- Our technology providers change;
- We introduce analytics, cookies, payments, or other technologies;
- Applicable privacy laws change;
- Zen Consulting becomes incorporated or otherwise changes its legal structure; or
- Our privacy practices otherwise change.

When we make material changes, we will update the "Last Updated" date at the beginning of this Policy and provide additional notice where required by applicable law.

26. Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy or our processing of personal data, contact:

Zen Consulting

Pune, Maharashtra, India

Email: hello@zenconsulting.dev

We encourage you to contact us first so that we can attempt to resolve your concern directly.

Nothing in this Privacy Policy limits any rights you may have under applicable privacy or data-protection law.
